NEW QUESTION: 1 Which of the following describes how the various risk management processes will be implemented, monitored, and controlled throughout the project and describes the criteria that are used to establish the risk threshold? **A.** Residual risks **B.** Workaround plans **C.** Checklists **D.** Risk management plans **E.** Risk response plans **Answer: D**

NEW QUESTION: 2 You need to ensure that the website scales. What should you do? **A.** Use a virtual network to route network traffic in a single Azure datacenter. **B.** Set up a new Azure datacenter to Azure datacenter VPN to enable the solution to communicate across regions. **C.** Enter multiple DNS entries in each virtual network to route requests to other Azure datacenters. **D.** Deploy Traffic Manager and configure it to route user traffic to specified endpoints to other Azure datacenters. **Answer: B** **Explanation:** Scenario: The customer-facing website must automatically scale and replicate to locations around the world. Azure ExpressRoute enables you to create private connections between Azure datacenters and infrastructure that's on your premises or in a colocation environment. ExpressRoute connections do not go over the public Internet, and offer more reliability, faster speeds, lower latencies and higher security than typical connections over the Internet. In some cases, using ExpressRoute connections to transfer data between on-premises and Azure can also yield significant cost benefits. **Reference:** ExpressRoute, Experience a faster, private connection to Azure <http://azure.microsoft.com/en-us/services/expressroute/>
