**Answer: A**

**NEW QUESTION: 3**You need to create an exclusion for two helpdesk RBAC (Role Based Access Control) groups to not have access to managers. You will need to pick 3 PowerShell commands from the available choices**A.** New-ManagementRole, New-ManagementScope, Set-ManagementScope (Guessed)**B.** Unsure of commands and correct answer**C.** New-ManagementScope, RecipientRestrictionFilter, New-ManagementRoleAssignment (Guessed)**D.** New-ManagementScope, New-ManagementRoleAssignment, CustomRecipientWriteScope (Guessed)**Answer: D**  
Explanation: Explanation/Reference: Explanation: C: Microsoft recommends that you: define the scope, then the role, then the role group, and finally, the role assignment. Management role scopes enable you to define the specific scope of impact or influence of a management role when a management role assignment is created. When you apply a scope, the role assignee assigned to the role can only modify the objects contained within that scope. A role assignee can be a management role group, management role, management role assignment policy, user, or universal security group (USG). For more information about management roles, see Understanding Role Based Access Control. References:

**NEW QUESTION: 4**You are producing a multiple linear regression model in Azure Machine Learning Studio. Several independent variables are highly correlated. You need to select appropriate methods for conducting effective feature engineering on all the data. Which three actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.**Answer:** Explanation: Explanation: Step 1: Use the Filter Based Feature Selection module Filter Based Feature Selection identifies the features in a dataset with the greatest predictive power. The module outputs a dataset that contains the best feature columns, as ranked by predictive power. It also outputs the names of the features and their scores from the selected metric. Step 2: Build a counting transform A counting transform creates a transformation that turns count tables into features, so that you can apply the transformation to multiple datasets. Step 3: Test the
