NEW QUESTION: 1The project manager at an organization has just realized that some of the engineering staff has been allocated to project Y and will not be available to finish task X The project manager has also discovered that at the current pace, it will not be possible to complete the project on time. Due to cost constraints, hiring more work force is not a viable option. Which tools are at the manager's disposal?**A.** Scheduling tools and applying leads and lags**B.** Fast tracking and crashing**C.** Resource leveling and fast tracking**D.** Crashing and applying leads and lags**Answer: C**

NEW QUESTION: 2What BEST describes the National Security Agency-developed Capstone?**A.** A chip that implements the US Escrowed Encryption Standard**B.** A device for intercepting electromagnetic emissions**C.** A one-way function for implementation of public key encryption**D.** The PC Card implementation of the Clipper Chip system**Answer: A****Explanation:**Capstone is a Very Large Scale Integration (VLSI) chip that employs the Escrowed Encryption Standard and incorporates the Skipjack algorithm, similar to the Clipper Chip. As such, it has a LEAF. Capstone also supports public key exchange and digital signatures. At this time, Capstone products have their LEAF function suppressed and a Certifying Authority provides for key recovery.***Answer "A device for intercepting electromagnetic emissions" is then, obviously, incorrect.**For information purposes, though, the US Government program to study and control the interception of electromagnetic emissions that may compromise classified information is called TEMPEST.* **Answer "The PC Card implementation of the Clipper Chip system" is also, obviously, incorrect.**However, Capstone was first implemented on a PC card called Fortezza.* **Answer "A one-way function for implementation of public key encryption" is incorrect since Capstone is not a mathematical function, but it incorporates mathematical functions for key exchange, authentication and encryption.**
