**Explanation:** The user is being blocked due to a 'risky sign-in'. This can be caused by the user logging in from a device that hasn't been used to sign in before or from an unknown location. Integration with Azure AD Identity Protection allows Conditional Access policies to identify risky sign-in

behavior. Policies can then force users to perform password changes or multi-factor authentication to reduce their risk level or be blocked from access until an administrator takes manual action. Reference:
