When yousee an answer containing the keyword: ALL It is something a give away that it is not the proper answer. On the real exam you may encounter a few question where the use of thework ALL renders the choice invalid. Pay close attention to such keyword.The following are incorrect answers:Even though most IDSs can detect some viruses and some password guessing attacks, they cannot detect ALL viruses or ALL password guessing attacks. Therefore these twoanswers are only detractors.Unless the IDS knows the valid values for a certain dataset, it can NOT detect data corruption.Reference used for this question:KRUTZ, Ronald L. & VINES, Russel D., The CISSP Prep Guide: Mastering the TenDomains of Computer Security, 2001, John Wiley & Sons, Page 48.
