NEW QUESTION: 2Which two Cisco IOS AAA features are available with the local database?

(Choose two.)**A.** network access authentication**B.** network accounting**C.** network access

authorization**D.** command authorization**Answer: A, D**Explanation:Explanation/Reference:

Explanation:Configuring the Local DatabaseThis section describes how to manage users in the

local database. You can use the local database for CLI access authentication, privileged mode

authentication, command authorization, network access authentication, and VPN

authentication and authorization. You cannot use the local database for network access

authorization. The local database does not support accounting.Reference:

http://www.cisco.com/c/en/us/td/docs/security/asa/asa80/configuration/guide/conf_gd/aaa.html

NEW QUESTION: 3 DRAG DROP Contoso, Ltd., uses Azure web apps for their company portal sites. Admin users need enough access to effectively perform site monitoring or management tasks. Management tasks do not include assigning permissions to other users. You need to grant admin access to a group of 10 users. How should you configure the connection? To answer, drag the role or object to the correct connection setting. Each item may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

Answer: Explanation:

NEW QUESTION: 4 Click to expand each objective. To connect to the Azure portal, type <https://portal.azure.com> in the browser address bar. When you are finished performing all the tasks, click the 'Next' button. Note that you cannot return to the lab once you click the 'Next' button. Scoring occurs in the background while you complete the rest of the exam. Overview The following section of the exam is a lab. In this section, you will perform a set of tasks in a live environment. While most functionality will be available to you as it would be in a live environment, some functionality (e.g., copy and paste, ability to navigate to external websites) will not be possible by design. Scoring is based on the outcome of performing the tasks stated in the lab. In other words, it doesn't matter how you accomplish the task, if you successfully perform it, you will earn credit for that task. Labs are not timed separately, and this exam may have more than one lab that you must complete. You can use as much time as you would like to complete each lab. But, you should manage your time appropriately to ensure that you are able to complete the lab(s) and all other sections of the exam in the time provided. Please note that once you submit your work by clicking the Next button within a lab, you will NOT be able to return to the lab. To start the lab You may start the lab by clicking the Next button. You plan to create several virtual machines in different availability zones, and then to configure the virtual machines for load balanced connections from the Internet. You need to create an IP address resource named ip1006 to support the planned load balancing solution. The solution must minimize costs. What should you do from the Azure portal? **Answer:** Explanation: See solution below. Explanation We should create a public IP address. * At the top, left corner of the portal, select + Create a resource. * Enter public ip address in the Search the Marketplace box. When Public IP address appears in the search results, select it. * Under Public IP address, select Create. * Enter, or select values for the following settings, under Create public IP address, then select Create: Name: ip1006 SKU: Basic SKU IP Version: IPv6 IP address assignment: Dynamic Subscription: Select appropriate Resource group: Select appropriate References: <https://docs.microsoft.com/en-us/azure/virtual-network/virtual-network-public-ip-address>
