**NEW QUESTION: 1**A customer has two new Dell EMC integrated Data Protection Appliances and wants to back up to both applications bidirectional. The data centers are connected by a WAN link that will also be used by other mission critical applications. To prepare for replication, the customer wants to co-locate both appliances at one data center and configure replication locally minimize the initial replication traffic.After the initial synchronization, one unit will be relocated and the network reconfigured at the disaster recovery data center, What is mandatory for this solution to be deployed?**A.** IDPA v2.2**B.** Minimum 1000 MB WAN link**C.** Approved RPQD. Segregated replication interface**Answer: C**

**NEW QUESTION: 2**Drag and drop the storage technologies from the left onto the correct descriptions on the right.**Answer:** Explanation:

**NEW QUESTION: 3**A customer is struggling with how to support application delivery to its highly mobile sales force. There are two Windows applications that need to be delivered, which could present a challenge. Both applications use a local copy of the central database and the applications are frequently being updated.During assessments and user interviews, the sales personnel indicated that they frequently use these two applications while traveling in areas with poor connectivity. The sales people rarely connect to the company network. Pushing out updates using a traditional deployment system is therefore difficult.Which solution from VMware would solve the customer's situation?**A.** Install the applications on RDS Hosts and publish them using Horizon 7. Since installed centrally,management of the applications will now be possible using traditional methods.**B.** Package the applications using ThinApp and manage delivery and updates using VMware IdentityManager.**C.** Package the application using ThinApp for isolation and publish them to users using Horizon 7. Place the ThinApp packages on a network share for central and easy updates.**D.** Package the applications as an App Volumes Appstack. Manage delivery and updates off the Appstack using VMware Identity Manager.**Answer: D**
