NEW QUESTION: 1A. Option DB. Option AC. Option BD. Option C Answer: D

NEW QUESTION: 2Your network consists of one Active Directory domain. All servers run Windows Server 2008 R2. You need to implement a storage management policy for. failover clustering that uses storage area network (SAN)-based storage. The solution must support the following requirements: * Maintain disk space usage information * Quota tracking by folder or by volume * Email notifications when users exceed their quota limits. What should you do? **A.** Use the File Server Resource Manager (FSRM). **B.** Create and deploy NTFS file system disk quotas. **C.** Install and configure the Storage Manager for SANs. **D.** Use the Performance Monitor. **Answer: A** Explanation: File Server Resource Manager With the increasing demand on storage resources, as organizations rely more heavily on data than ever before, IT administrators face the challenge of overseeing a larger and more complex storage infrastructure, while at the same time, tracking the kind of information available in it. Managing storage resources not only includes data size and availability any more but also the enforcement of company policies and a very good understanding of how existing storage is utilized, allowing for sound strategic planning and proper response to organizational changes. File Server Resource Manager is a suite of tools that allows administrators to understand, control, and manage the quantity and type of data stored on their servers. By using File Server Resource Manager, administrators can place quotas on folders and volumes, actively screen files, and generate comprehensive storage reports. This set of advanced instruments not only helps the administrator to efficiently monitor existing storage resources but it also aids in the planning and implementation of future policy changes. To create quotas that set a soft or hard space limit on a volume or folder tree To create file screening rules that block files from a volume or a folder tree To generate storage reports that can be used to monitor disk usage patterns, identify duplicate files and dormant files, track quota usage, and audit file screening <http://technet.microsoft.com/en-us/library/cc755603%28v=ws.10%29.aspx>

NEW QUESTION: 3How should a policy manager write policies that adhere to compliance regulations effectively and easily? **A.** By copying an existing policy and editing as necessary **B.** By using a policy template and editing as necessary **C.** By creating a new blank policy and adding fitting rules **D.** By using a compliance data identifier in the policy **Answer: B**
