NEW QUESTION: 1 While setting up the RFC connections for a Central User Administration (CUA) in an AS ABAP-based SAP system, you are required to observe which of the following naming conventions? (There are 2 correct answers to this question) Response: **A.** The users that are used for the RFC connections for the CUA need to be of type "SYSTEM" with authorization SAP_ALL. **B.** You need to use trusted RFC connections for setting up a CUA environment. **C.** The required RFC connections have to be named in capital letters. **D.** The naming convention recommended by SAP for both RFC connections and logical system names, is the following: "CUA_", for example, CUA_DEV. **E.** The required RFC connections have to be named identically to the logical system they are connecting to. **Answer: C,E**

NEW QUESTION: 2 Refer to the exhibit. Which three statements about this configuration are true? (Choose three.) **A.** 192.168.1.1 is reachable using any of the addresses on the router where the static route is configured. **B.** The subnet 192.168.1.0 is unique to the VRF red routing table. **C.** The static route is added to the global routing table and leaked from the VRF red. **D.** The subnet 192.168.1.0 is unique to the global routing table. **E.** The static route appears in the VRF red routing table. **F.** The default route appears in the global routing table. **Answer: D,E,F**
Explanation: This is an example of the route leaking feature. Here, this static route is created for the red VRF so it will be installed into the red VRF routing table, but the use of the global keyword will cause this default route to appear in the global routing table.

NEW QUESTION: 3 Which three activities would use summary accounts?
