**NEW QUESTION: 1** Consider the following code: When a user clicks on the displayed link, which site will he navigate to? **A.** No other site, because there is a runtime error **B.** www.google.com **C.** www.yahoo.com **D.** www.msn.com **Answer: C** Explanation: Explanation/Reference:

**NEW QUESTION: 2** Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not. After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen. You have a Microsoft 365 subscription. You discover that some external users accessed content on a Microsoft SharePoint site. You modify the SharePoint sharing policy to prevent sharing outside your organization. You need to be notified if the SharePoint policy is modified in the future. Solution: From the SharePoint admin center, you modify the sharing settings. Does this meet the goal? **A.** Yes **B.** No **Answer: B** Explanation: Explanation You need to create a threat management policy in the Security & Compliance admin center.

**NEW QUESTION: 3** Which of the following is characterized by an attacker attempting to map out an organization's staff hierarchy in order to send targeted emails? **A.** Whaling **B.** Impersonation **C.** Privilege escalation **D.** Spear phishing **Answer: A** Explanation: A whaling attack is targeted at company executives. Mapping out an organization's staff hierarchy to determine who the people at the top are is also part of a whaling attack. Whaling is a specific kind of malicious hacking within the more general category of phishing, which involves hunting for data that can be used by the hacker. In general, phishing efforts are focused on collecting personal data about users. In whaling, the targets are high-ranking bankers, executives or others in powerful positions or job titles. Hackers who engage in whaling often describe these

efforts as "reeling in a big fish," applying a familiar metaphor to the process of scouring technologies for loopholes and opportunities for data theft. Those who are engaged in whaling may, for example, hack into specific networks where these powerful individuals work or store sensitive data. They may also set up keylogging or other malware on a work station associated with one of these executives. There are many ways that hackers can pursue whaling, leading C-level or top-level executives in business and government to stay vigilant about the possibility of cyber threats.

**NEW QUESTION: 4** Risks perspectives differ within the organization between executive management, operations management, portfolio management and project/program management. When it comes to Operations management, which of the following is a risk concern?  
**A.** Issues with Product development  
**B.** Time to market  
**C.** Time, cost and scope commitments  
**D.** Reporting and data accuracy  
**Answer: A**  
**Explanation:** Explanation Risk concerns for operations management risk concerns generally involve issues with product and project development, organization products, services, and processes needed to support change
