**A.** Hashing images of compromised systems  
**B.** Enforcing DLP controls at the perimeter  
**C.** Analyzing network traffic and device logs  
**D.** Reviewing the date of the antivirus definition files  
**Answer: C**

Thus to establish an accurate timeline for a network intrusion you can look at and analyze the device logs and network traffic to yield the appropriate information.  
**Incorrect Answers:**  
**A.** Hashing is used to do integrity checks and not to establish timelines for network intrusions.  
**B.** Antivirus definition files shows how up to date your antivirus protection for your network is and not when an intrusion occurred.  
**D.** Enforcing DLP controls are meant to prevent data loss and not to establish accurate timelines insofar as network intrusion is concerned.
