**NEW QUESTION: 2**SCENARIOPlease use the following to answer the next question:For 15 years, Albert has worked at Treasure Box - a mail order company in the United States (U.S.) that used to sell decorative candles around the world, but has recently decided to limit its shipments to customers in the 48 contiguous states. Despite his years of experience, Albert is often overlooked for managerial positions. His frustration about not being promoted, coupled with his recent interest in issues of privacy protection, have motivated Albert to be an agent of positive change. He will soon interview for a newly advertised position, and during the interview, Albert plans on making executives aware of lapses in the company's privacy program. He feels certain he will be rewarded with a promotion for preventing negative consequences resulting from the company's outdated policies and procedures. For example, Albert has learned about the AICPA (American Institute of Certified Public Accountants)/CICA (Canadian Institute of Chartered Accountants) Privacy Maturity Model (PMM). Albert thinks the model is a useful way to measure Treasure Box's ability to protect personal data. Albert has noticed that Treasure Box fails to meet the requirements of the highest level of maturity of this model; at his interview, Albert will pledge to assist the company with meeting this level in order to provide customers with the most rigorous security available. Albert does want to show a positive outlook during his interview. He intends to praise the company's commitment to the security of customer and employee personal data against external threats. However, Albert worries about the high turnover rate within the company, particularly in the area of direct phone marketing. He sees many unfamiliar faces every day who are hired to do the marketing, and he often hears complaints in the lunch room regarding long hours and low pay, as well as what seems to be flagrant disregard for company procedures. In addition, Treasure Box has had two recent security incidents. The company has responded to the incidents with internal audits and updates to security safeguards. However, profits still seem to be affected and anecdotal

evidence indicates that many people still harbor mistrust. Albert wants to help the company recover. He knows there is at least one incident the public is unaware of, although Albert does not know the details. He believes the company's insistence on keeping the incident a secret could be a further detriment to its reputation. One further way that Albert wants to help Treasure Box regain its stature is by creating a toll-free number for customers, as well as a more efficient procedure for responding to customer concerns by postal mail. In addition to his suggestions for improvement, Albert believes that his knowledge of the company's recent business maneuvers will also impress the interviewers. For example, Albert is aware of the company's intention to acquire a medical supply company in the coming weeks. With his forward thinking, Albert hopes to convince the managers who will be interviewing him that he is right for the job. Based on Albert's observations, executive leadership should most likely pay closer attention to what?

**A.** Awareness campaigns with confusing information  
**B.** Outdated security frameworks  
**C.** Potential in-house threats  
**D.** Obsolete data processing systems

**Answer: B**

**NEW QUESTION: 3** You need to deploy several WLCs to manage Unified APs on the main site and on remote locations (on different subnets). A wireless network printer is added to the network. Multicast is used to discover the printer. You enable multicast-multicast mode on the WLCs. Which two of these statements are true, considering interoperability and requirements of the network? (Choose two.)

**A.** There is no need to configure multicast routing on the infrastructure, because all the wireless clients are on the same VLAN or subnet.  
**B.** You can configure any multicast IP address on the WLCs, as long as you make sure to use the same address on the WLCs.  
**C.** There is no need to allow multicast traffic on the WAN VPN links to the remote locations, because this traffic goes within the LWAPP/CAPWAP tunnel.  
**D.** The infrastructure should be ready to allow multicast routing from the WLC management interfaces to all managed APs.  
**E.** To avoid issues, you need to make sure that the WLC multicast IP address is different for each controller and is not used for anything else on the network.

**Answer: D, E**

**NEW QUESTION: 4** Into which two pieces of information does the LISP protocol split the device identity? (Choose two)

**A.** Routing Locator  
**B.** Enterprise Identifier  
**C.** Endpoint Identifier  
**D.** Resource Location  
**E.** LISP IDF  
**F.** Device ID

**Answer: A, C**

**Explanation:** Locator ID Separation Protocol (LISP) is a network architecture and protocol that implements the use of two namespaces instead of a single IP address:

- + Endpoint identifiers (EIDs)-assigned to end hosts.
- + Routing locators (RLOCs)-assigned to devices (primarily routers) that make up the global routing system.
