We want to become the leader in this industry, Get soon and **EJSA_2024 Exam Certification Cost** avail the big chance for your best selection for your future, We will try our best to solve your problems for you.

Once you fail exam we will full refund to you.

NEW QUESTION: 1Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.After you answer a question, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.You need to create an IoT solution that performs the following tasks:* Identifies hazards* Provides a real-time online dashboard* Takes images of an area every minute* Counts the number of people in an area every minute
Solution: You configure the IoT devices to send the images to an Azure IoT hub, and then you configure an Azure Functions call to Azure Cognitive Services that sends the results to an Azure event hub. You configure Microsoft Power BI to connect to the event hub by using Azure Stream Analytics.Does this meet the goal?**A. No****B. Yes****Answer: A**Explanation:ExplanationInstead use Cognitive Services containers on the IoT devices.References:
<https://azure.microsoft.com/es-es/blog/running-cognitive-services-on-iot-edge/>
<https://docs.microsoft.com/en-us/azure/iot-hub/iot-hub-live-data-visualization-in-power-bi>

NEW QUESTION: 2You run the Get-DNSServer cmdlet on DC01 and receive the following output:You need to recommend changes to DC01. Which attribute should you recommend modifying?**A. EnablePollutionProtection****B. Locking Percent****C. isReadOnly****D. ZoneType****Answer: B**Explanation:* Scenario: The DNS servers must be prevented from overwriting the existing DNS entries that have been stored in cache.* Cache locking is configured as a percent value. For example, if the cache locking value is set to 50, then the DNS server will not overwrite a cached entry for half of the duration of the TTL. By default, the cache locking percent value is 100. This means that cached entries will not be overwritten for the entire duration of the TTL. The cache locking value is stored in the CacheLockingPercent registry key. If the registry key is not present, then the DNS server will use the default cache locking value of 100.Reference: DNS Cache Locking<https://technet.microsoft.com/en-us/library/ee649148%28v=ws.10%29.aspx>

NEW QUESTION: 3The BEST way to manage continuous improvement of governance-related processes is to:**A. require third-party independent reviews.****B. apply effective quality management practices.****C. define accountability based on roles and responsibilities.****D. assess existing process resource capacities.****Answer: B**
