**NEW QUESTION: 1**You need to develop, test, and deploy the Vendor Exclusion list solution. What should you create? To answer, drag the appropriate objects to the correct actions. Each element may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content. NOTE: Each correct selection is worth one point.

**Answer:** Explanation:Explanation:Box 1: packageAn AOT package is a deployment and compilation unit of one or more models that can be applied to an environment. It includes model metadata, binaries, reports and other associated resources. One or more AOT packages can be packaged into a deployable package, which is the vehicle used for deployment of code (and customizations) on demo, sandbox, and production environments.Box 2: New model Model - You configure your model to refer to two other models. This enables your model to reference metadata and code elements that are in other packages.Box 3: projectProject - You create a project and then associate your project to your new model. You add elements to your project, which are also added to your model. Specifically, you add an extended data type (EDT). You also add a table that you populate with fields and a method.Box 4: deployable package Reference:
