**NEW QUESTION: 1** Which data type must you use when adding a field to reference Legal Entity in an MDF object? Please choose the correct answer. Response: **A. Generic object B. Picklist C. Data source D. Foundation object** **Answer: A**

**NEW QUESTION: 2** Kerberos provides an integrity check service for messages between two entities through the use of: **A. Credentials B. Tickets C. A trusted, third-party authentication server D. A checksum** **Answer: D** Explanation: A checksum that is derived from a Kerberos message is used to verify the integrity of the message. This checksum may be a message digest resulting from the application of a hash function to the message. At the receiving end of the transmission, the receiving party can calculate the message digest of the received message using the identical hash algorithm as the sender. Then the message digest calculated by the receiver can be compared with the message digest appended to the message by the sender. If the two message digests match, the message has not been modified en route, and its integrity has been preserved. For answers Credentials and Tickets are authenticators used in the process of granting user access to services on the network. Answer "A trusted, third-party authentication server" is the AS or authentication server that conducts the ticket-granting process.

**NEW QUESTION: 3** When removing or replacing the heat sink or processor on the Mac Pro (8x), what is the maximum acceptable amount of time for the heat sink to be separated from the processor? **A. Fifteen (15) minutes B. Sixty (60) minutes C. Five (5) minutes D. Thirty (30) minutes** **Answer: A**
