Therefore, by using our SAFe-SASM training materials, there will be little problem for you to pass the exam, The excellent study guides, practice questions and answers and dumps offered by Photoexperienceacademy **Reliable SAFe-SASM Test Labs** are your real strength to take the test with confidence and pass it without facing any difficulty.

NEW QUESTION: 1Which of the following are enhancements included in the Spring 11 release?
A. Group and Professional Edition organizations can use report builder.**B.** Chatter feed posts now has a "like" option.**C.** You get scatter charts, a new chart type for reports.**D.** All profiles get access to the report builder by default.**E.** The old report wizard is totally phased out.**Answer: A,C,D**

NEW QUESTION: 2SIMULATION Fill in the blank with the appropriate file system. Alternate Data Streams (ADS) is a feature of the _____ file system, which allows more than one data stream to be associated with a filename.**Answer:** Explanation: NTFS

NEW QUESTION: 3You are about to plug a multi-terabyte non-CDB into an existing multitenant container database (CDB). The characteristics of the non-CDB are as follows: -Version: Oracle Database 11g Release 2 (11.2.0.2.0) 64-bit -Character set: AL32UTF8 -National character set: AL16UTF16 -O/S: Oracle Linux 6 64-bit The characteristics of the CDB are as follows: -Version: Oracle Database 12c Release 1 64-bit -Character Set: AL32UTF8 -National character set: AL16UTF16 -O/S: Oracle Linux 6 64-bit Which technique should you use to minimize down time while plugging this non-CDB into the CDB? **A.** The DBMS_PDB package **B.** Data Pump full export/import **C.** Transportable database **D.** RMAN **E.** Transportable tablespace **Answer: E**
Explanation: * Overview, example: -Log into ncdb12c as sys -Get the database in a consistent state by shutting it down cleanly. -Open the database in read only mode -Run DBMS_PDB.DESCRIBE to create an XML file describing the database. -Shut down ncdb12c -Connect to target CDB (CDB2) -Check whether non-cdb (NCDB12c) can be plugged into CDB(CDB2) -Plug-in Non-CDB (NCDB12c) as PDB(NCDB12c) into target CDB(CDB2). -Access the PDB and run the noncdb_to_pdb.sql script. -Open the new PDB in read/write mode. *You can easily plug an Oracle Database 12c non-CDB into a CDB. Just create a PDB manifest file for the non-CDB, and then use the manifest file to create a cloned PDB in the CDB. *Note that to plugin a non-CDB database into a CDB, the non-CDB database needs to be of version 12c as well. So existing 11g databases will need to be upgraded to 12c before they can be part of a 12c CDB.

NEW QUESTION: 4A. Option BB. Option AC. Option DD. Option C
Answer: B
Explanation: One of the first steps is to create SPO administrative account. You should always plan to create this account as Cloud ID, E.g. [email#160;protected]. Having this as Cloud ID, it allows you to access your tenant even if On-Premises ADFS environment is unavailable. You can provision new Cloud Account from the Office 365 Administration site.
