All the Products are fully updated, We only send you the PDF version of the C_CPE_16 study materials, Just click on the mouse to have a look, giving you a chance to try.

We will give you the best service and suggestion on the C_CPE_16 study material, So far, with the help of SAP Certified Associate - Backend Developer - SAP Cloud Application Programming Model exam study material, lots of candidates have got an effective method to overcome the difficult in C_CPE_16 exam test.

NEW QUESTION: 1HOTSPOTYou have an Active Directory domain named Contoso.com. The domain contains Hyper-V hosts named Server1 and Server2 that run Windows Server 2016. The Hyper-V hosts are configured to use NVGRE for network virtualization.You have six virtual machines that are connected to an external switch. The virtual machines are configured as shown.To which virtual machine or virtual machines can VM1 and VM3 connect? To answer, select the appropriate options in the answer area.**Hot Area:Answer:** Explanation: Explanation/Reference:The GRE keys must match.To separate the traffic between the two virtualized networks, the GRE headers on the tunneled packets include a GRE Key that provides a unique Virtual Subnet ID for each virtualized network.References: <https://blogs.technet.microsoft.com/keithmayer/2012/10/08/step-by-step-hyper-v-network-virtualization-31-days-of-favorite-features-in-winserv-2012-part-8-of-31/>

NEW QUESTION: 2You create a service level agreement (SLA) that will fail after seven days. You select a service calendar that uses 24-hour work days and no holidays. Saturday and Sunday are configured to be non-working days.If no action is taken, how many calendar days can pass before the SLA fails?**A. 5 daysB. 9 daysC. 11 daysD. 7 daysAnswer: A**

NEW QUESTION: 3Compliance with company policy requires a quarterly review of firewall rules. A new administrator is asked to conduct this review on the internal firewall sitting between several internal networks. The intent of this firewall is to make traffic more restrictive.

Given the following information answer the questions below: User Subnet: 192.168.1.0/24
Server Subnet: 192.168.2.0/24 Finance Subnet: 192.168.3.0/24 Instructions: To perform the necessary tasks, please modify the DST port, Protocol, Action, and/or Rule Order columns. Firewall ACLs are read from the top down

Task 1) An administrator added a rule to allow their machine terminal server access to the server subnet. This rule is not working. Identify the rule and correct this issue.

Task 2) All web servers have been changed to communicate solely over SSL. Modify the appropriate rule to allow communications.

Task 3) An administrator added a rule to block access to the SQL server from anywhere on the network. This rule is not working. Identify and correct this issue.

Task 4) Other than allowing all hosts to do network time and SSL, modify a rule to ensure that no other traffic is allowed.

Answer: Explanation: Check the solution below.

Screen Shot 2015-04-09 at 10

Task 1) An administrator added a rule to allow their machine terminal server access to the server subnet. This rule is not working. Identify the rule and correct this issue. The rule shown in the image below is the rule in question. It is not working because the action is set to Deny. This needs to be set to Permit.

Task 2) All web servers have been changed to communicate solely over SSL. Modify the appropriate rule to allow communications. The web servers rule is shown in the image below. Port 80 (HTTP) needs to be changed to port 443 for HTTPS (HTTP over SSL).

Task 3) An administrator added a rule to block access to the SQL server from anywhere on the network. This rule is not working. Identify and correct this issue. The SQL Server rule is shown in the image below. It is not working because the protocol is wrong. It should be TCP, not UDP.

Task 4) Other than allowing all hosts to do network time and SSL, modify a rule to ensure that no other traffic is allowed. The network time rule is shown in the image below. However, this rule is not being used because the 'any' rule shown below allows all traffic and the rule is placed above the network time rule. To block all other traffic, the 'any' rule needs to be set to Deny, not Permit and the rule needs to be placed below all the other rules (it needs to be placed at the bottom of the list to the rule is enumerated last).

NEW QUESTION: 4 Which of the following step are NOT part of the complete footprint for Transportation Management capabilities?
A. Optimize **B.** Execute **C.** Streamline **D.** Analyze
Answer: C
