NEW QUESTION: 1You are proposing a solution to a group that conflicts with a competing initiative of one of the group members.Which audience type does this group member belong to?**A.** uninformed**B.** sympathetic**C.** critical**D.** hostile**Answer: D**

NEW QUESTION: 2Which of the following is needed for System Accountability?**A.** Audit mechanisms.**B.** Documented design as laid out in the Common Criteria.**C.** Authorization.**D.** Formal verification of system design.**Answer: A****Explanation:**Explanation/Reference:Is a means of being able to track user actions. Through the use of audit logs and other tools the user actions are recorded and can be used at a later date to verify what actions were performed. Accountability is the ability to identify users and to be able to track user actions.The following answers are incorrect:Documented design as laid out in the Common Criteria. Is incorrect because the Common Criteria is an international standard to evaluate trust and would not be a factor in System Accountability.Authorization. Is incorrect because Authorization is granting access to subjects, just because you have authorization does not hold the subject accountable for their actions.Formal verification of system design. Is incorrect because all you have done is to verify the system design and have not taken any steps toward system accountability.**References:**OIG CBK Glossary (page 778)

NEW QUESTION: 3DRAG DROPYou are developing an ASP.NET MVC application in Visual Studio. The application supports multiple cultures.To set the culture, the application must use the AcceptLanguage header field value sent by the client browser.You need to ensure that the application can set the culture.You have the following markup in the web.config file:Which markup segments should you include in Target 1, Target 2 and Target 3 to complete markup? To answer, drag the appropriate markup segments to the correct targets. Each markup segment may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.**Answer:** Explanation:ExplanationTarget1: globalizationTarget2: enableClientBasedCultureTarget3: uiCultureWhen the EnableClientBasedCulture property is enabled, the Culture and UICulture properties are based on the AcceptLanguage header field value that is sent by the client browser. If the AcceptLanguage header value cannot be mapped to a specific culture, the Culture and UICulture values are used. The default value is false.The following combination of attributes is used in the globalization section: culture="auto", uiCulture="auto", enableClientBasedCulture="true", e.g.:<globalization uiCulture="auto" culture="auto"

enableClientBasedCulture="true"> References:
