NEW QUESTION: 2 Refer to the exhibit. Which out-of-dialog SIP OPTIONS ping response put dial-peer tag 1111 into its current operational state? **A.** 504 Server Time-out **B.** 408 Request Timeout **C.** 503 Service Unavailable **D.** 486 Busy Here **E.** 501 Not Implemented **Answer: C**
Explanation: Explanation/Reference: Explanation: SIP 503 Service Unavailable is commonly seen in a VoIP network when a SIP device (such as a SIP server) is knowingly unable to process a call. Typically when this happens the endpoint that originated the Invite will try the next available host it receives in the SIP Contact header.

NEW QUESTION: 3 _____ families create the building components that would usually be purchased, delivered, and installed in and around a building, such as doors, windows and furniture. **A.** Basic **B.** system **C.** In-place **D.** Loadable **Answer: B**

NEW QUESTION: 4 Which of the following questions is less likely to help in assessing identification and authentication controls? **A.** Are passwords changed at least every ninety days or earlier if needed? **B.** Are inactive user identifications disabled after a specified period of time? **C.** Is a current list maintained and approved of authorized users and their access? **D.** Is there a

process for reporting incidents?**Answer: D**Explanation:We just some common sense to answer this question correctly, why are we going to ask about process reporting for incidents?, does it help relating to identification and authentication?, I don't think so. There are other more interesting questions, password deal with authentication, inactive user Ids are also related to identification. But the most important to me, know if there is a list with authorized users and their current access, this can help you to identify unauthorized activities.
