They believe and rely on us, If you have any questions about purchasing D-VPX-DY-A-24 exam software, you can contact with our online support who will give you 24h online service.

**NEW QUESTION: 1** A user has received a message from the support team that an issue occurred 1 week back between 3 AM to 4 AM and the EC2 server was not reachable. The user is checking the CloudWatch metrics of that instance. How can the user find the data easily using the CloudWatch console?  
**A.** It is not possible to find the exact time from the console. The user has to use CLI to provide the specific time  
**B.** The user can find the data by giving the exact values in the time Tab under CloudWatch metrics  
**C.** The user can find the data by filtering values of the last 1 week for a 1 hour period in the Relative tab under CloudWatch metrics  
**D.** The user can find the data by giving the exact values in the Absolute tab under CloudWatch metrics  
**Answer: D**  
**Explanation:** If the user is viewing the data inside the CloudWatch console, the console provides options to filter values either using the relative period, such as days /hours or using the Absolute tab where the user can provide data with a specific date and time. The console also provides the option to search using the local timezone under the time range caption in the console.

**NEW QUESTION: 2** Which of the following description about the group management for VGMP is wrong?  
**A.** master/slave devices exchange packets to understand each other through the heartbeat line, and backup the related commands and status information  
**B.** Periodically sends Hello packets between VGMP of master/slave firewall  
**C.** The interface type and number of two firewalls heartbeat port may be different, as long as they can communicate with each other  
**D.** Master/slave status change of VRRP backup group needs to notify its VGMP management group  
**Answer: C**

**NEW QUESTION: 3** You plan to acquire a secure connection between a data center and Azure for disaster recovery purposes. The company anticipates moving more than 5 terabytes (TB) of data during each failover instance. You have the following requirements:  
\* You must be able to monitor connection throughput and all network traffic.  
\* You must minimize the time it takes to transfer data after a failover.  
You need to recommend the correct configuration. What should you recommend? To answer, select the appropriate connection and routing gateway from the lists on the answer area.  
**Answer:** Explanation: Explanation
