NEW QUESTION: 3Testlet: Graphic Design Institute, Case AYou need to ensure that Admin1 can administer the Web servers to meet the company's technical requirements.To which group should you add Admin1?Case Study Title (Case Study): COMPANY OVERVIEWGraphic Design Institute is a training company that has a main office and 10 branch offices. The main office is located in Bangalore.PLANNED CHANGESGraphic Design Institute plans to implement the following changes:Deploy a new two-node failover cluster that runs the Hyper-V server role on each node. Ensure that intra-cluster network traffic is isolated from all other network traffic. Implement Network Access Protection (NAP) for all of the client computers on the internal network and for all of the client computers that connect remotely.EXISTING ENVIRONMENTThe relevant servers in the main office are configured as shown in the following table.NPAS1 contains a static IP address pool.Web1, Web2, and Web3 host a copy of the corporate Web site. Web1, Web2, and Web3 are located in the perimeter network and belong to a workgroup.All client computers run Windows XP Professional, Windows Vista Enterprise, or Windows 7 Enterprise, Allclient computers are members of the domain.Some users work remotely. To access the company's internal resources, the remote users use a VPN connection to NPAS1. Existing Active Directors/Directory ServicesThe network contains a single-domain Active Directory forest named graphicdesigninstitute.com.The Active Directory Recycle Bin is enabled. Existing Network InfrastructureGraphic Design Institute has an internal network and a perimeter network.The network contains network switches and wireless access points (WAPs) from multiple vendors. Some of the network devices are more than 10 years old and do not support port-based authentication.TECHNICAL REQUIREMENTSAll of the accounts used for administration must be assigned the minimum amount of permissions.Web1, Web2, and Web3 must have the identical configurations for the corporate Web site.The Web servers must contain a local copy of all the Web pages in the Web site. When a Web page is modified on any of the Web servers, the modifications must be copied automatically to all of the Web servers.A user named Admin1 must be responsible for performing the following tasks:Restarting all of the Web servers.Backing up and restoring the files on all of the Web servers.A user named Admin2

must be responsible for performing the following tasks; Backing up the Active Directory database. Recovering deleted objects from the Active Directory Recycle Bin. **A.** Administrators local group on each Web server **B.** Domain Admins global group **C.** Backup Operators domain local group **D.** Backup Operators local group on each Web server **Answer: D** Explanation: Explanation/Reference: As all web servers are members of workgroup, only local groups available. Backup Operators local group can back up and restore files on a computer, regardless of any permissions that protect those files. This is because the right to perform a backup takes precedence over all file permissions. Members of this group cannot change security settings. The member can Access this computer from the network Allow logon locally Back up files and directories Bypass traverse checking Log on as a batch job Restore files and directories Shut down (/restarting) the system
