NEW QUESTION: 1 Passive discovery methods may impact the platform used for monitoring. **A. False B. True**
Answer: A
Explanation: There are two types of discovery methods: active and passive. Active discovery methods can run processes that are detrimental and can impact a system. They normally require an agent. With passive discovery methods, data is obtained in a non-impact, non-intrusive manner, with no agents. Obtaining and interpreting/presenting data such as this normally requires more experience.
