**NEW QUESTION: 2** You have a Windows Server 2012 R2 Hyper-V environment that includes System Center 2012 R2 Virtual Machine Manager (VMM). The environment includes five physical servers. The servers are configured as follows: You plan to use VMM to migrate physical machines to virtual machines. You need to reconfigure the hardware on the servers to support a physical to virtual offline migration. Which three servers should you reconfigure? Each correct answer presents part of the solution.
