NEW QUESTION: 2What is the impact on network bandwidth when selecting 'Global' on a rule instead of 'Local' in a distributed environment?
A. All matching events are sent to the QRadar Console for processing and therefore, the QRadar Console uses more bandwidth.
B. All matching events are sent to each QRadar Event Processor for processing and therefore, all Event Processors use more bandwidth.
C. All events are sent to each QRadar Event Processor for processing and therefore, all Event Processors use more bandwidth.
D. All events are sent to the QRadar Console for processing and therefore, the QRadar Console uses more bandwidth.
Answer: A
Explanation: If you select Local, all rules are processed on the Event Processor on which they were received and offenses are created only for the events that are processed locally. If you select Global, all matching events are sent to the QRadar Console for processing and therefore, the QRadar Console uses more bandwidth and processing resources.
