NEW QUESTION: 1Which of the following policies is a set of rules designed to enhance computer security by encouraging users to employ strong passwords and use them properly?**A.** Group policy**B.** Remote access policy**C.** Information protection policy**D.** Password policy

Answer: D
Explanation:A password policy is a set of rules designed to enhance computer security by encouraging users to employ strong passwords and use them properly. Password policies are account policies that are related to the users' accounts. Such policies are password-related settings that provide different constraints for the password's usage. Password policies can be configured to enforce users to provide passwords only in a specific way when they try to log on to their computers. These policies increase the effectiveness of the user's computers. Answer option C is incorrect. A group policy specifies how programs, network resources, and the operating system work for users and computers in an organization. Answer option A is incorrect. An information protection policy ensures that information is appropriately protected from modification or disclosure. Answer option B is incorrect. Remote access policy is a document that outlines and defines acceptable methods of remotely connecting to the internal network.
