The appropriate selection for the training of 200-201 test is a guarantee of success.

NEW QUESTION: 1 DRAG DROP **Answer:** Explanation:

NEW QUESTION: 2 While rotating stock you notice an expiration date on a bottle that reads 08/10. What is the last day that product may be used? **A.** July 31, 2010 **B.** August 31, 2010 **C.** September 1, 2010 **D.** August 1, 2010 **Answer: B**

NEW QUESTION: 3 ----Which of the following is correct with respect to roles within an enterprise-wide risk management process? The board provides oversight to the risk management process. Executive management owns the risk management framework. Senior management is assigned ownership of risks. Internal audit modifies the risk assessment determined by management. **A.** 1 and 2 only. **B.** 1, 2, and 3 only. **C.** 3 and 4 only. **D.** 1, 2, 3, and 4. **Answer: B**

NEW QUESTION: 4 A company has a Windows Server 2012 R2 server that has the Hyper-V role installed. The server hosts 12 virtual machines (VMs) that run Windows Server 2012 R2. The company plans to deploy System Center 2012 R2 Data Protection Manager (DPM). The company has identified the following requirements for the DPM deployment: allow files and folders on VMs to be recovered allow recovery of data to a network share minimize the number of DPM protection agents that you must deploy You need to implement the backup solution. Which two actions should you perform? Each correct answer presents part of the solution. **A.** Add the Hyper-V role to the DPM server. **B.** Deploy the DPM protection agent to VMs. **C.** Configure DPM to perform guest-level backups of the VMs. **D.** Configure DPM to perform host-level backups of the VMs. **E.** Deploy a DPM server. **Answer: A, E** **Explanation:** Explanation/Reference: * DPM protection supports the following scenarios: / (this scenario) Protects virtual machines that are hosted on stand-alone servers that run Hyper-V and that use local or directly attached storage. / Protects virtual machines that run on a cluster. The cluster uses Cluster Shared Volumes (CSV) storage. / Protects virtual machines that run on a stand-alone server or cluster and that use SMB 3.0 file server storage. / Protects virtual machines that are running during a live migration. * Example: Protection for virtual machines on a stand-alone server that is running Hyper-V This configuration protects one or more virtual machines on a stand-alone host computer. Storage can be local on the host server, or directly attached to it, for example a hard drive, a storage area network (SAN) device, or a network attached storage (NAS) device. Alternatively, the host server might use SMB 3.0 storage on an alternate file server. The DPM protection agent must be installed on all hosts and on the file server if storage is hosted by using SMB 3.0. **Incorrect:** Not B: Would not minimize the number of Protection Agents. Ref: <https://social.technet.microsoft.com/wiki/contents/articles/17493.protecting-hyper-v-virtual-machines-with-system-center-dpm-2012.aspx>
