As you can sense by now, and we really hope that you can be the next beneficiary of our H19-434_V1.0 training materials, We hope that our new design of H19-434_V1.0 test questions will make the user's learning more interesting and colorful.

So all of us staff participating in the aftersales and production quality help you with the HCSA-Presales-Storage V1.0 practice exam and being your backup, Our H19-434_V1.0 exam questions can give you some help.

NEW QUESTION: 1A. Option BB. Option CC. Option AD. Option D**Answer: C****Explanation:** Information Security Framework The basic information security framework is built to achieve four security goals, confidentiality, integrity, and availability (CIA) along with accountability. This framework incorporates all security standards, procedures and controls, required to mitigate threats in the storage infrastructure environment.**Confidentiality:** Provides the required secrecy of information and ensures that only authorized users have access to data. This requires authentication of users who need to access information. Data in transit (data transmitted over cables) and data at rest (data residing on a primary storage, backup media, or in the archives) can be encrypted to maintain its confidentiality. In addition to restricting unauthorized users from accessing information, confidentiality also requires to implement traffic flow protection measures as part of the security protocol. These protection measures generally include hiding source and destination addresses, frequency of data being sent, and amount of data sent.**Integrity:** Ensures that the information is unaltered . Ensuring integrity requires detection and protection against unauthorized alteration or deletion of information. Ensuring integrity stipulate measures such as error detection and correction for both data and systems.**Availability:** This ensures that authorized users have reliable and timely access to systems, data and applications residing on these systems. Availability requires protection against unauthorized deletion of data and denial of service. Availability also implies that sufficient resources are available to provide a service. **Accountability:** Refers to accounting for all the events and operations that take place in the data center infrastructure. The accountability service maintains a log of events that can be audited or traced later for the purpose of security.**EMC E10-001 Student Resource Guide. Module 14: Securing the Storage Infrastructure**

NEW QUESTION: 2Sie haben ein Microsoft 365-Abonnement.Sie konfigurieren Berechtigungen für Security & Compliance.Sie müssen sicherstellen, dass die Benutzer die in der folgenden Tabelle aufgeführten Aufgaben ausführen können.Die Lösung muss das Prinzip des geringsten Privilegs anwenden.Welcher Rolle sollten Sie jeden Benutzer zuordnen?
