NEW QUESTION: 3 You are reviewing the business requirements for an implementation of CRM on Demand so that you can prepare a data import plan. There is a requirement to enable several processes that will require heavy use of custom Opportunity lists. You review the specific requirements for those lists and find that several custom fields will need to be used as filters and for sorting.What should you do to optimize the performance of those lists after all of the data is imported into the system?**A.** Select the Indexed field type when creating new custom Opportunity fields to use for the list filters and sorting. Then, map the data into those fields during data import.**B.** Create new custom Opportunity fields to use for the list filters and sorting. Map the data into those fields during data Import. Then, select the Case Insensitive check box when creating the custom lists.**C.** Create new custom Opportunity fields to use for the list filters and sorting. Map the data into those fields during data Import. Then, set the sort order on those custom fields when creating the custom lists.**D.** Relabel the Indexed fields provided for the Opportunity object to use for the list filters and sorting. Then, map the data into those fields during data Import.**Answer: D**Explanation:We should use index on the custom fields that will be used for filtering andsorting.This will improve performance.Use Indexed FieldsDo the following:*Use indexed field to filter data in real-time reports.Indexed fields are optimized so your report results appear more quickly.*Plan ahead when you set up your data

to make sure that the correct data is stored in the indexed fields. Following this practice allows you to build reports that use the indexed fields, incorporating them at the best possible places. Oracle CRM On Demand also has a limited number of indexed custom fields. The number varies according to the field type and record type.
