Answer: D

NEW QUESTION: 2 A user needs to copy existing products from a pricebook. What should be taken into consideration when cloning products or pricebooks? **A.** Pricebooks cannot be cloned when the user has access on products and pricebooks **B.** Customer should be able to create a pricebook if they have access to pricelist **C.** Pricebook must be enabled first before user can use the the pricelist **D.** Pricebooks cannot be cloned when the user has no access on products and pricebooks **E.** Enable manage pricebooks
Answer: D

NEW QUESTION: 3 You have a branch policy in a project in Azure DevOps. The policy requires that code always builds successfully. You need to ensure that a specific user can always merge change to the master branch, even if the code fails to compile. The solution must use the principle of least privilege. What should you do? **A.** From the Security setting of the repository, modify the access control for the user. **B.** Add the user to the Build Administrators group. **C.** From the Security settings of the branch, modify the access control for the user. **D.** Add the user to the Project Administrators group
Answer: C
Explanation: Explanation In some cases, you need to bypass policy requirements so you can push changes to the branch directly or complete a pull request even if branch policies are not satisfied. For these situations, grant the desired permission from the previous list to a user or group. You can scope this permission to an entire project, a repo, or a single branch. Manage this permission along the with other Git permissions. References:

NEW QUESTION: 4 HOTSPOT You administer an Azure Active Directory (Azure AD) tenant. You add a custom application to the tenant. The application must be able to: * Read data from the tenant directly. * Write data to the tenant on behalf of a user. In the table below, identify the permission that must be granted to the application. Make only one selection in each column.
Answer: Explanation: Explanation: Application Permission: Read directory data The application must be able to Read data from the tenant directly. Delegated Permission: Read and write Directory Data The application must be able to write data to the tenant on behalf of a user. As an administrator, you can also consent to an application's delegated permissions on behalf of all the users in your tenant. This will prevent the consent dialog from appearing for every user in the tenant. You can do this from the Azure portal from your application page. From the Settings blade for your application, click Required Permissions and click on the Grant Permissions button.
