You can download our free demo [Real C\\_ARSCC\\_2208 Exam Questions](#) which is the little part of the real test dumps before.

**NEW QUESTION: 1** DRAG DROP You need to ensure that profile information about contractors and employees is available in search results. Which three actions should you perform in sequence? (To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.) Select and Place: **Answer:** Explanation:

Explanation/Reference: Note: \* From Scenario: Allow resource coordinators from Blue Yonder to find temporary staffing options from Margie's Travel contractors and employees. \* How to create and configure a SharePoint Search service application When you deploy and configure a Search service application, you perform the following main tasks: Create accounts- Certain domain user accounts are required specifically for a Search service application. Create a Search service application- A Search service application provides enterprise search features and functionality. Configure the Search service application- Basic configuration of a Search service application includes configuring a default content access account, an email contact, and content sources. You configure a Search service application on the Search Administration page for that service application. Configure the Search service application topology- You can deploy search components on different servers in the farm. You can also specify which instance of SQL Server is used to host the search-related databases. \* Enabling continuous crawl has the following advantages: The search results are very fresh, because the SharePoint content is crawled frequently to keep the search index up to date. The search administrator does not have to monitor changing or seasonal demands for content freshness. Continuous crawls automatically adapt as necessary to the change rate of the SharePoint content.
