A. Set-ClientAccessServer
B. Set-MailboxServer
C. Start-ManagedFolderAssistant
D. Set-DistributionGroup
Answer: B
Explanation: Explanation/Reference: Explanation: We need to use the Set-MailboxServer cmdlet with the ForceGroupMetricsGeneration parameter to force a count of the number of members of the distribution groups. The ForceGroupMetricsGeneration parameter specifies that group metrics information must be generated on the Mailbox server regardless of whether that server generates an offline address book (OAB). By default, group metrics are generated only on servers that generate OABs. Group metrics information is used by MailTips to inform senders about how many recipients their messages will be sent to. You need to use this parameter if your organization doesn't generate OABs and you want the group metrics data to be available.
