NEW QUESTION: 1 Several bins are located throughout a building for secure disposal of sensitive information. Which of the following does this prevent? **A.** Dumpster diving **B.** War chalking **C.** Tailgating **D.** War driving **Answer: A**
Explanation: The bins in this question will be secure bins designed to prevent someone accessing the 'rubbish' to learn sensitive information. Dumpster diving is looking for treasure in someone else's trash. (A dumpster is a large trash container.) In the world of information technology, dumpster diving is a technique used to retrieve information that could be used to carry out an attack on a computer network. Dumpster diving isn't limited to searching through the trash for obvious treasures like access codes or passwords written down on sticky notes. Seemingly innocent information like a phone list, calendar, or organizational chart can be used to assist an attacker using social engineering techniques to gain access to the network. To prevent dumpster divers from learning anything valuable from your trash, experts recommend that your company establish a disposal policy where all paper, including print-outs, is shredded in a cross-cut shredder before being recycled, all storage media is erased, and all staff is educated about the danger of untracked trash.

NEW QUESTION: 2 After adding a remote-access IPsec tunnel via the VPN wizard, an administrator needs to tune the IPsec policy parameters. Where is the correct place to tune the IPsec policy parameters in Cisco ASDM? **A.** IPsec Policy **B.** Crypto Map **C.** IPsec user profile **D.** IKE Policy **E.** Group Policy **Answer: B**

NEW QUESTION: 3

プライマリ管理ノードがダウンしていて、セカンダリ管理ノードが昇格されていない場合に使用できる2つの機能はどれですか。 () **A.** BYOD **B.** hotspot **C.** guest AUP **D.** posture **E.** new AD user 802 1X authentication **Answer: B,C**
