Heatherが実行する必要がある唯一の管理タスクは、ユーザーアカウントの管理です。プロバイダーは、ハードウェア、オペレーティングシステム、およびパッチ適用と監視を含むソフトウェア管理を担当します。このタイプのソリューションは次のうちどれですか？
A. IaaS
B. SaaS
C. CaaS
D. PaaS
Answer: B
Explanation: Software as a service (SaaS) allows users to attach to and use cloud-based apps over the web. Common examples are email, calendaring and workplace tool (such as Microsoft workplace 365). SaaS provides a whole software solution that you get on a pay-as-you-go basis from a cloud service provider. You rent the use of an app for your

organisation and your users connect with it over the web, typically with an internet browser. All of the underlying infrastructure, middleware, app software system and app knowledge are located within the service provider's knowledge center. The service provider manages the hardware and software system and with the appropriate service agreement, can make sure the availability and also the security of the app and your data as well. SaaS allows your organisation to induce quickly up and running with an app at token upfront cost. Common SaaS scenarios This tool having used a web-based email service like Outlook, Hotmail or Yahoo! Mail, then you have got already used a form of SaaS. With these services, you log into your account over the web, typically from an internet browser. The e-mail software system is found on the service provider's network and your messages are held on there moreover. You can access your email and hold on messages from an internet browser on any laptop or Internet-connected device. The previous examples are free services for personal use. For organisational use, you can rent productivity apps, like email, collaboration and calendaring; and sophisticated business applications like client relationship management (CRM), enterprise resource planning (ERP) and document management. You buy the use of those apps by subscription or per the level of use. Advantages of SaaS Gain access to stylish applications. To supply SaaS apps to users, you don't ought to purchase, install, update or maintain any hardware, middleware or software system. SaaS makes even sophisticated enterprise applications, like ERP and CRM, affordable for organisations that lack the resources to shop for, deploy and manage the specified infrastructure and software system themselves. Pay just for what you utilize. You furthermore may economize because the SaaS service automatically scales up and down per the level of usage. Use free shopper software system. Users will run most SaaS apps directly from their web browser without needing to transfer and install any software system, though some apps need plugins. This suggests that you simply don't ought to purchase and install special software system for your users. Mobilise your hands simply. SaaS makes it simple to "mobilise" your hands as a result of users will access SaaS apps and knowledge from any Internet-connected laptop or mobile device. You don't ought to worry concerning developing apps to run on differing types of computers and devices as a result of the service supplier has already done therefore. Additionally, you don't ought to bring special experience aboard to manage the safety problems inherent in mobile computing. A fastidiously chosen service supplier can make sure the security of your knowledge, no matter the sort of device intense it. Access app knowledge from anyplace. With knowledge held on within the cloud, users will access their info from any Internet-connected laptop or mobile device. And once app knowledge is held on within the cloud, no knowledge is lost if a user's laptop or device fails.
