We need fresh things to enrich our life, 100% Satisfaction guarantee, As long [H28-111 V1.0 Guaranteed Passing](#) as the syllabus has changed, they need to repurchase learning materials, You can get the downloading link and password within ten minutes after payment.

You have the opportunity to download **CPC Exam Answers** the three different versions from our test platform.

NEW QUESTION: 1 Which three statements about IS-IS are true? (Choose three.)
A. IS-IS has three different levels of authentication: interface level, process level, and domain level.
B. IS-IS can be used to route both IP and CLNP.
C. IS-IS is a Cisco proprietary routing protocol.
D. IS-IS is an IETF standard.
E. IS-IS has the capability to provide address summarization between areas.
F. IS-IS can be used only in the service provider network.
Answer: A,B,E
Explanation: Intermediate System to Intermediate System (IS-IS) was designed as the routing protocol for ISO's CLNP described in ISO 10589. IS-IS is a Link State routing protocol akin to OSPF and was developed by DEC for use with DECnet Phase V. It was originally thought that TCP/IP would gradually make way for the seven layer OSI architecture so an enhancement to IS-IS was developed called Integrated IS-IS also known as Dual IS-IS that could route both Connectionless-Mode Network Service (CLNS) as well as IP. Cisco IOS supports IS-IS authentication on 3 different levels; between neighbors, area-wide, and domain-wide, where each can be used by themselves or together.
summary-address address mask {level-1 | level-1-2 | level-2} is used to configure IP address summarization.

NEW QUESTION: 2 A. Option B B. Option C C. Option D D. Option A
Answer: D

NEW QUESTION: 3 Was sollte ein Controller tun, nachdem sich eine betroffene Person von einer Direktmarketing-Aktivität verabschiedet hat?
A. Ergreifen Sie angemessene Maßnahmen, um Drittempfänger darüber zu informieren, dass die personenbezogenen Daten der betroffenen Person gelöscht und nicht mehr verarbeitet werden sollten.
B. Keine personenbezogenen Daten der betroffenen Person für die jeweilige Art der Kommunikation verarbeiten.
C. Löschen Sie ausnahmslos alle personenbezogenen Daten der betroffenen Person.
D. Geben Sie der betroffenen Person unverzüglich Informationen über die durchzuführenden Maßnahmen.
Answer: B

NEW QUESTION: 4 Amy is working on a project which is forty percent complete though it was scheduled to be fifty percent complete as of today. Management has asked Amy to report on the schedule variance for her project. If Amy's project has a BAC of \$750,000 and she has spent \$485,000 to date, what is the schedule variance value?
A. -\$42,000
B. -\$45,000
C. -\$75,000
D. -\$65,000
Answer: C
Explanation/Reference: Explanation: The schedule variance is found by subtracting the planned value from the earned value. The earned value is the percentage of the project completeness multiplied by the BAC. Planned value is the percentage of where the project should be at this time multiplied by the BAC. Schedule variance (SV) is a measure of schedule performance on a project. The variance notifies that the schedule is ahead or behind what was planned for this period in time. The schedule variance is calculated based on the following formula: $SV = \text{Earned Value (EV)} - \text{Planned Value (PV)}$ If the resulting schedule is

negative, it indicates that the project is behind schedule. A value greater than 0 shows that the project is ahead of the planned schedule. A value of 0 indicates that the project is right on target. In this example, $EV = 40\%$ of $BAC = 300,000$, and $PV = 50\%$ of $BAC = 375,000$. $SV = 300,000 - 375,000 = -75,000$. Incorrect Answers: B, C, D: These are not the correct values for the schedule variance.
