NEW QUESTION: 1 Which of the following could be classified as ROT Data?
A. Trivial data that has no value to the company or the user
B. High-value company information that needs to be identified
C. Records data hidden in piles of unstructured data
D. Operational records that need to be retained
Answer: A
Explanation: The IBM@ Legacy Data Cleanup solution improves information economics through the clean up of redundant, obsolete and trivial (ROT) data. It can remediate regulated data according to personally identifiable information (PII), payment card industry (PCI), Health Insurance Portability and Accountability Act (HIPPA) and human resources policies and improve the security of data with high-business value. The Legacy Data Cleanup solution helps organizations increase the value derived from data while reducing the costs and risks associated with managing it.
