**NEW QUESTION: 1**You need to use Azure Automation Sure Configuration to manage the ongoing consistency of virtual machine configurations.Which five actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.NOTE: More than one order of answer choices in correct. You writ receive credit for any of the orders you select.**Answer:** Explanation: ExplanationStep 1: Assign the node configuration.You create a simple DSC configuration that ensures either the presence or absence of the Web-Server Windows Feature (IIS), depending on how you assign nodes.Step 2: Upload a configuration to Azure Automation State Configuration. You import the configuration into the Automation account.Step 3: Compiling a configuration into a node configurationCompiling a configuration in Azure AutomationBefore you can apply a desired state to a node, a DSC configuration defining that state must be compiled into one or more node configurations (MOF document), and placed on the Automation DSC Pull Server. Step 4: Onboard the virtual machines to Azure State ConfigurationOnboarding an Azure VM for management with Azure Automation State Configuration Step 5: Check the compliance status of the node.Viewing reports for managed nodes. Each time Azure Automation State Configuration performs a consistency check on a managed node, the node sends a status report back to the pull server. You can view these reports on the page for that node.On the blade for an individual report, you can see the following status information for the corresponding consistency check:The report status - whether the node is "Compliant", the configuration "Failed", or the node is "Not Compliant" (when the node is in ApplyandMonitor mode and the machine is not in the desired state).References: <https://docs.microsoft.com/en-us/azure/automation/automation-dsc-getting-started>
