**NEW QUESTION: 3**A user wants to disable connection draining on an existing ELB. Which of the below mentioned statements helps the user disable connection draining on the ELB?  
**A. The user can disable the connection draining feature from EC2 -> ELB console or from CLI B. The user can only disable connection draining from CLI C. It is not possible to disable the connection draining feature once enabled D. The user needs to stop all instances before disabling connection draining**  
**Answer: A**  
Explanation: The Elastic Load Balancer connection draining feature causes the load balancer to stop sending new requests to the back-end instances when the instances are deregistering or become unhealthy, while ensuring that in-flight requests continue to be served. The user can enable or disable connection draining from the AWS EC2 console -> ELB or using CLI.
