NEW QUESTION: 1Where is an XML firewall most commonly and effectively deployed in the environment?**A.** Between the application and data layers**B.** Between the presentation and application layers**C.** Between the IPS and firewall**D.** Between the firewall and application server

Answer: D**Explanation:**An XML firewall is most commonly deployed in line between the firewall and application server to validate XML code before it reaches the application. An XML firewall is intended to validate XML before it reaches the application. Placing the XML firewall between the presentation and application layers, between the firewall and IPS, or between the application and data layers would not serve the intended purpose.

NEW QUESTION: 2What does the following command do? `cp -r dir2 dir3`**A.** copies all files and subdirectories from dir3 to dir2**B.** copies and removes the files from dir2 to dir3**C.** renames the directory from dir2 to dir3**D.** copies all the files and subdirectories from dir2 to dir3**Answer: D**

NEW QUESTION: 3You have to import several transport requests into an AS ABAP-based SAP system using transaction STMS (Transport Management System). In the import queue of one of the SAP systems the "Import Request" (Import Single) button is displayed, but the "Import All Requests" (Import All) button is missing. What could be the reason?**A.** Client-specific transport routes have been configured.**B.** The authorization for "Import All Requests" is missing for the respective SAP system.**C.** The "Queue-controlled transports, single transports" strategy has been set.**D.** The "Import All Requests" button is never available in a development system.

Answer: C

NEW QUESTION: 4**A.** Option A**B.** Option C**C.** Option D**D.** Option B**Answer: A****Explanation:**To let a user manage a content library and its items, an Administrator can assign the Content Library Administrator role to that user as a global permission. The Content Library Administrator role is a sample role in the vSphere Web Client. Users who are Administrators can also manage libraries and their contents. If a user is an Administrator at a vCenter Server level, they have sufficient privileges to manage the libraries that belong to this vCenter Server instance, but cannot see the libraries unless they have a Read-Only role as a global permission.Reference:
