NEW QUESTION: 1You have a large amount of historical data in a flat file. Some analysts in your organization need to query this data in the file. The file is too large to load the data in it into your current database.Which is the most effective method to access this data in your database?**A.** Create an external table and leave the data in the flat file.**B.** Use the Oracle Data Pump utility.**C.** Use the SQL*Loader utility.**D.** Use the database link.**Answer: A**

NEW QUESTION: 2Your network contains an Active Directory domain named contoso.com. Your company plans to open a branch office. The branch office will have 10 client computers that run Windows 8 and at least one server that runs Windows Server 2012. The server will host BranchCache files and manage print queues for the network print devices in the branch office. You need to recommend a solution to ensure that the users in the branch office can print if the branch office server fails.What should you recommend?More than one answer choice may achieve the goal. Select the BEST answer.**A.** Printer pooling**B.** A print server cluster**C.** Branch Office Direct Printing**D.** A secure Web Services on Devices (WSD) printer**E.** A standby print server
Answer: CExplanation:Branch Office Direct Printing can reduce Wide Area Network (WAN) usage by printing directly to a print device instead of a server print queue. This feature can be enabled or disabled on a per printer basis and is transparent to the user.This feature requires a print server running Windows Server 2012 and clients running Windows 8. It is enabled by an administrator using the Print Management Console or Windows PowerShell on the server.
