NEW QUESTION: 1 Which type of wireless encryption is used for WPA2 in preshared key mode?
A. AES-256 B. AES-128 C. RC4 D. TKIP with RC4
Answer: A
Explanation: Explanation We can see in this picture we have to type 64 hexadecimal characters (256 bit) for the WPA2 passphrase so we can deduce the encryption is AES-256, not AES-128.

NEW QUESTION: 2 Which of the following statement about :he NAT is wrong?
A. For some non-TCP. UDP protocols (such as ICMP. PPTP), unable to do the NAT translation
B. Address Translation can follow the needs of users, providing FTP. WWW, Telnet and other services outside the LAN
C. Some application layer protocols earn/ IP address information in the data, but also modify the P address information in the data of the upper layer when they are as NAT
D. NAT technology can effectively hide the hosts of the LAN. it is an effective network security protection technology
Answer: A

NEW QUESTION: 3 What is the default file system quota policy on the Dell EMC Unity XT storage array?
A. Tree Quotas **B.** User Quotas **C.** Blocks **D.** File Size
Answer: D
Explanation: When using quotas, administrators have the option to calculate file system usage in one of two ways. This option, which is configured on a per file system basis, may be set to File Size or Block based calculation. When using the default setting of File Size, disk usage is calculated based on logical file sizes in 1K increments. Because of this, it is possible that used space may be reported from a quota perspective as more than the actual usage if holes exist in a sparse file. This setting is generally recommended for Windows environments. The Block quota policy calculates disk usage in 8-16KB file system blocks, and is accurate with regard to the actual allocation down to the block level. This setting is recommended for UNIX environments.
