a product on CD, you will be able to select the shipping option of your choice during the checkout process.

And further more, we have free demos of the NS0-014 learning guide on the website for you to download before you make the purchase, Have you ever used Photoexperienceacademy exam dumps or heard Photoexperienceacademy dumps from the people around you?

Network Appliance NS0-014 valid dumps will remove your NS0-014 exam fear and you will take the actual Network Appliance NS0-014 test with confidence, If you still hesitate about whether you should purchase NS0-014 exam preparation or NS0-014 real dumps or not, I advise you to purchase directly, it is absolutely the best save-time, save-energy and highly effective action.

Remember to check your mailbox please, At Examscheif, you can prepare for the Implementation Engineer - MetroCluster Exam NS0-014 exam without facing any issues, And then you can choose anyone which you think is the most appropriate NS0-014 exam simulations to you.

**NEW QUESTION: 1**Which details do you map when you replicate entities from costing-based CO-PA to the universal journal?**A.** Value fields**B.** Characteristics**C.** Reconciliation objects**D.** G/L accounts**Answer: B**

**NEW QUESTION: 2**Select the five tasks that need to be performed on the Automated Installer (AI) install server before setting up the client.**A.** DHCP must be available on the network for the Install server and the clients, but the install server does not need to be the DHCP server.**B.** Set up a IP address on the AI install server.**C.** Create the AI install service.Specify the path to the AI network boot image ISO file and the path where the AI net image ISO file should be unpacked.**D.** Install the AI installation tools.**E.** Create the AI install service. Specify the path to the AI network boot image ISO file and the path to the IPS repository.**F.** The DHCP server must be enabled on the install server and must provide the DHCP service for the clients.**G.** Download the AI boot image. The image must be the same version as the Oracle Solaris OS that you plan to install on the client.**H.** Download the text install image into the IPS repository.**I.** Create a local IPS repository on the AI Install server and start the repository server service, the publisher origin to the repository file.**Answer: A,B,D,E,H**Explanation:B:Configure the AI install server to use a static IP address and default route.D: The create-service command can set up DHCP on the AI install server. If you want to set up a separate DHCP server or configure an existing DHCP server for use with AI. The DHCP server must be able to provide DNS information to the systems to be installed.E: An automated installation of a client over the network consists of the following high-level steps:1.The client system boots over the network and gets its network configuration and the location of the install server from the DHCP server.2.The install server provides a boot image to the client.3.Characteristics of the client determine which installation instructions and which system configuration instructions are used to install the client.4.The Oracle Solaris 11 OS is installed on the client, pulling packages from the package repository specified by the installation instructions in the AI install service.G: Install the AI tool set.Use the installadm create-service command to create an AI install service. Give the service a meaningful name, and specify the path where you want the service created. Specify the source of the network boot image (net image) package or ISO file.installadm create-service [-n svcname] [-s FMRI\_or\_ISO] [-d imagepath]-d imagepath The imagepath is the location of the new install service. The install-image/solaris-autoinstall package is installed to this location, or the specified ISO file is expanded at this location.Reference: Installing Oracle Solaris 11 Systems, Create an AI Install Service

**NEW QUESTION: 3**You deploy an Active Directory domain named contoso.com to the network. The domain is configured as an Active Directory-integrated zone.All domain controllers run

Windows Server 2012 and are DNS servers. You plan to deploy a child domain named operations.contoso.com. You need to recommend changes to the DNS infrastructure to ensure that users in the operations department can access the servers in the contoso.com domain. What should you include in the recommendation?**A.** Changes to the replication scope of \_msdcs.contoso.com**B.** Changes to the replication scope of contoso.com**C.** Changes to the replication scope of operations.contoso.com**D.** A zone delegation for \_msdcs.contoso.com

**Answer:** **B**Explanation:<http://support.microsoft.com/kb/255248>Manually Create a Delegation for the Child Domain on the Parent (Root) DNS Server1. Right-click the root zone, click New Delegation, and then click Next.2. Type the domain name for the child domain, and then click Next.3. Add the child DNS server to host the new zone, and then click Next.NOTE: A domain controller that is a DNS server should have a static Transport Control Protocol/Internet Protocol (TCP/IP) address. Verify that this step is performed before you install DNS on the child domain controller. If no DNS TCP/IP address exists, DNS is installed as a root server. If you see that a "." folder is created after you install DNS, you must remove the root configuration. For additional information about how to do this, click the article number below to view the article in the Microsoft Knowledge Base:[229840](#) DNS Server's Root Hints and Forwarder Pages Are Unavailable4. On the child domain DNS server, right-click My Network Places, and then click Properties.5. Right-click the appropriate local connection, and then click Properties.6. Under Components checked are used by this connection, click Internet Protocol (TCP/IP), and then click Properties.7. Click Use the following DNS server addresses:, and then type the TCP/IP address of the parent (root) DNS server.

**NEW QUESTION: 4**Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution. After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen. You have an enumeration named truckStatus that has the following statuses:EmptyLoadedCompletedYou have the following code:You need to extend this enumeration and add the following statuses to the enumeration: Quarantine, InTransit. You must then modify code that validates the switch statement.Solution: Add a post handler to the method that checks the enumeration and logic for your new enumeration values using the enumeration value.Does the solution meet the goal?**A.** No**B.** Yes.**Answer:** **B**
