**NEW QUESTION: 4**You are working on a cloud native e-commerce application on Oracle Cloud Infrastructure (OCI). Your application architecture has multiple OCI services, including Oracle Functions. You need to trigger these functions directly from other OCI services, without having to run custom code.Which OCI service cannot trigger your functions directly?**A.** OCI Events Service**B.** OCI API Gateway**C.** Oracle Integration**D.** OCI Registry**Answer: D**Explanation:Oracle Functions is a fully managed, multi-tenant, highly scalable, on-demand, Functions-as-a-Service platform. It is built on enterprise-grade Oracle Cloud Infrastructure and powered by the Fn Project open source engine. Use Oracle Functions (sometimes abbreviated to just Functions) when you want to focus on writing code to meet business needs.The serverless and elastic architecture of Oracle Functions means there's no infrastructure administration or software administration for you to perform. You don't provision or maintain compute instances, and operating system software patches and upgrades are applied automatically. Oracle Functions simply ensures your app is highly-available, scalable, secure, and monitored. With Oracle Functions, you can write code in Java, Python, Node, Go, and Ruby (and for advanced use cases, bring your own Dockerfile, and Graal VM).You can invoke a function that you've deployed to Oracle Functions from:- The Fn Project CLI.- The Oracle Cloud Infrastructure SDKs.- Signed HTTP requests to the function's invoke endpoint. Every function has an invoke endpoint.- Other Oracle Cloud services (for example, triggered by an event in the Events service) or from external

services.so You can then deploy your code, call it directly or trigger it in response to events, and get billed only for the resources consumed during the execution.Below are the oracle services that can trigger Oracle functions-Events Service-Notification Service-API Gateway Service -Oracle Integration service(using OCI Signature Version 1 security policy) so OCI Registry services cannot trigger your functions directly
