NEW QUESTION: 1You work as a developer at ABC.com. ABC.com makes use of Microsoft Dynamics AX 2012 in their environment.You have been instructed to make sure that all changes in a current transaction are explicitly discarded. You have to call a command from the ttsLevel checking feature.Which of the following options should you make use of?**A.** ttsCommit**B.** ttsBegin**C.** ttsDelete**D.** ttsAbort**Answer: D**

NEW QUESTION: 2プラットフォーム保護要件を満たすには、AKS1を展開する必要があります。どの4つのアクションを順番に実行する必要がありますか？
回答するには、適切なアクションをアクションのリストから回答エリアに移動し、正しい順序に並べます。注：回答の選択肢の複数の順序が正しいです。
選択した正しい注文のいずれかのクレジットを受け取ります。**Answer:** Explanation:Explanation Scenario: Azure AD users must be to authenticate to AKS1 by using their Azure AD credentials. Litewire plans to deploy AKS1, which is a managed AKS (Azure Kubernetes Services) cluster. Step 1: Create a server applicationTo provide Azure AD authentication for an AKS cluster, two Azure AD applications are created. The first application is a server component that provides user authentication.Step 2: Create a client applicationThe second application is a client component that's used when you're prompted by the CLI for authentication.This client application uses the server application for the actual authentication of the credentials provided by the client.Step 3: Deploy an AKS cluster.Use the az group create command to create a resource group for the AKS cluster.Use the az aks create command to deploy the AKS cluster. Step 4: Create an RBAC binding.Before you use an Azure Active Directory account with an AKS cluster, you must create role-binding or cluster role-binding. Roles define the permissions to grant, and bindings apply them to desired users. These assignments can be applied to a given namespace, or across the entire cluster.Reference: <https://docs.microsoft.com/en-us/azure/aks/azure-ad-integration>

NEW QUESTION: 3When segregation of duties concerns exist between IT support staff and end users, what would be a suitable compensating control?**A.** Restricting physical access to computing equipment**B.** Reviewing transaction and application logs**C.** Locking user sessions after a specified period of inactivity**D.** Performing background checks prior to hiring IT staff **Answer: B**Explanation:Only reviewing transaction and application logs directly addresses the threat posed by poor segregation of duties. The review is a means of detecting inappropriate

behavior and also discourages abuse, because people who may otherwise be tempted to exploit the situation are aware of the likelihood of being caught. Inadequate segregation of duties is more likely to be exploited via logical access to data and computing resources rather than physical access. Choice C is a useful control to ensure IT staff are trustworthy and competent but does not directly address the lack of an optimal segregation of duties. Choice D acts to prevent unauthorized users from gaining system access, but the issue of a lack of segregation of duties is more the misuse (deliberately or inadvertently) of access privileges that have officially been granted.

NEW QUESTION: 4 A Citrix Engineer needs to map a network drive for the HR user group, but does NOT want the network drive to be available to Windows XP users. Which step can the engineer take within Workspace Environment Management (WEM) to complete this task? **A.** Add the Infrastructure Services server ADMX template to the Active Directory group policy and configure the network drive setting in a GPO. Then apply a filter to assign the No Client OS Match condition to Windows XP and assign the GPO to the OU containing the HR users. **B.** Add the network drive in the WEM environmental settings and apply the No Client OS Match condition to Windows XP. Then assign environmental setting to the HR user group. **C.** Create an action mapping the network drive and apply the No Client OS Match condition to Windows XP. Then assign the action to the HR user group. **D.** Use the Management Agent Host Configuration ADMX template to specify the network drive location. Then apply a filter to assign the No Client OS Match condition to Windows XP and a second filter to assign the Active Directory Group Match to the HR user group. **Answer: A**
