NEW QUESTION: 1 Case Study 5 Requirements Receipt processing Concurrent processing of a receipt must be prevented. Logging Azure Application Insights is used for telemetry and logging in both the processor and the web application. The processor also has TraceWriter logging enabled. Application Insights must always contain all log messages. Disaster recovery Regional outage must not impact application availability. All DR operations must not be dependent on application running and must ensure that data in the DR region is up to date. Security* Users' SecurityPin must be stored in such a way that access to the database does not allow the viewing of SecurityPins. The web application is the only system that should have access to SecurityPins.* All certificates and secrets used to secure data must be stored in Azure Key Vault.* You must adhere to the principle of least privilege and provide privileges which are essential to perform the intended function.* All access to Azure Storage and Azure SQL database must use the application's Managed Service Identity (MSI)* Receipt data must always be encrypted at rest.* All data must be protected in transit* User's expense account number must be visible only to logged in users. All other views of the expense account number should include only the last segment, with the remaining parts obscured.* In the case of a security breach access to all

summary reports must be revoked without impacting other parts of the system. Issues Upload format issue Employees occasionally report an issue with uploading a receipt using the web application. They report that when they upload a receipt using the Azure File Share, the receipt does not appear in their profile. When this occurs, they delete the file in the file share and use the web application, which returns a 500 Internal Server error page. Capacity issue During busy periods, employees report long delays between the time they upload the receipt and when it appears in the web application. Log capacity issue Developers report that the number of log message in the trace output for the processor is too high, resulting in lost log messages. Application code Processing.cs Database.cs ReceiptUploader.cs ConfigureSSE.ps1 Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution. After you answer a question in this question, you will NOT be able to return to it. As a result, these questions will not appear in the review screen. You need to ensure that the SecurityPin security requirements are met. Solution: Enable Always Encrypted for the SecurityPin column using a certificate contained in Azure Key Vault and grant the WebAppIdentity service principal access to the certificate. Does the solution meet the goal? **A. Yes** **B. No** **Answer: A** Explanation: Scenario: Users' SecurityPin must be stored in such a way that access to the database does not allow the viewing of SecurityPins. The web application is the only system that should have access to SecurityPins.

NEW QUESTION: 2 Frames sent over the trunk port of a switch are always tagged. **A. TRUE** **B. FALSE** **Answer: B**

NEW QUESTION: 3 You need to ensure that the transcode.exe utility is installed before the worker role starts. You have the following markup: Which markup segments should you include in Target 1, Target 2, Target 3, Target 4 and Target 5 to implement the startup task? To answer, drag the appropriate markup segments to the correct targets. Each markup segments may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content. **Answer:** Explanation: Explanation Target 1: simple Target 2: Environment Target 3: Variable Target 4: Variable Target 5: Environment
