NEW QUESTION: 1DRAG DROPYou are the SharePoint administrator for Contoso, Ltd. You plan to create a public website for Contoso's customers by using content that is created in SharePoint. The public site will contain information that is created by internal users. Pages are created dynamically based on navigation. You have the following requirements:- The marketing department is responsible for creating web page content and needs an approval workflow for any content generated before the content is made available to site visitors.- The sales department is responsible for creating a product catalog that includes information concerning products, such as properties, price, and delivery estimates. - The customer relationship department is responsible for ensuring that customer documentation is accessible for

approved clients and vendors. You need to design the environment. What should you do? To answer, drag the appropriate site collection type or content type to the correct location. Each site collection type or content type may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content. **Answer:** Explanation: Explanation: *The Publishing site collection is on the perimeter network. *Marketing, Sales, and the Customer relationships department work on the Authoring site collection in the local network. *The Marketing department works with the Pages library as they are responsible for creating the web page content. *The Sales department works with the Document library as they work with a product catalog. *The customer relationship department makes sure clients and vendors get access so they work with lists.
