(Choose two.) **A.** The running configuration is displayed only if the letter Y is entered at the CLI. **B.** The EEM applet runs after the CLI command is executed. **C.** The EEM applet requires a case-insensitive response. **D.** The EEM applet runs before the CLI command is executed. **Answer: A, D** **Explanation:** nync Indicates whether the policy should be executed synchronously before the CLI command is executed. If the yes keyword is specified, the policy will run synchronously with the CLI command. If the no keyword is specified, the policy will run asynchronously with the CLI command. **no case** (Optional) Specifies case-insensitive comparison. Here we see that the nync knob was enabled so A is correct. However, C is not correct as the no case argument was not used, so the applet is configured to display the config only if a capital Y is entered. **Reference:**
