So, if you prefer, you don't have to spend all the day before Latest Public-Sector-Solutions Exam Practice the screen, Photoexperienceacademy's braindumps provide you the gist of the entire syllabus in a specific set of questions and answers.

Every minute Public-Sector-Solutions study quiz saves for you may make you a huge profit.

NEW QUESTION: 1You need to ensure that all the MVC controllers are secure.Which code segment should you use as the body for the CreateController method in AdminVerifierFactory.cs?**A.** Option B**B.** Option D**C.** Option A**D.** Option C**Answer: D**

NEW QUESTION: 2Which of the following would be best suited to oversee the development of an information security policy?**A.** Security Officers**B.** End User**C.** Security administrators**D.** System Administrators**Answer: A****Explanation:**Explanation/Reference:Explanation:The chief security officer (CSO) is responsible for understanding the risks that the company faces and for mitigating these risks to an acceptable level. This role is responsible for understanding the organization's business drivers and for creating and maintaining a security program that facilitates these drivers, along with providing security, compliance with a long list of regulations and laws, and any customer expectations or contractual obligations.Incorrect Answers:A: System Administrators work in the IT department and manage the IT infrastructure from a technical perspective. They do not specialize in security and are therefore not best suited to oversee the development of an information security policy.B: End users are the least qualified to oversee the development of an information security policy.D: The security administrator is responsible for implementing and maintaining specific security network devices and software in the enterprise. Security administrators are not best suited to oversee the development of an information security policy.References:Harris, Shon, All In One CISSP Exam Guide, 6th Edition, McGraw-Hill, New York, 2013, pp. 119-122

NEW QUESTION: 3You are deploying an application that will use an Azure Cosmos DB database. Users of the application will be located in Seattle, London, and Singapore. The application will be used to read and write to the database.The users in each location will access the application only between 09:00 and 17:00 local time. Business hours do not overlap between the locations.You need to recommend a solution to minimize write latency during business hours.What should you recommend**A.** Deploy three separate Cosmos DB accounts.

Deploy the application to three Azure regions. Create a job that automates a backup and restore of the accounts.**B.** Deploy a Cosmos DB account that replicates to three Azure regions. Deploy the application to the three regions. Create a job that automates a manual failover of the write region.**C.** Deploy a Cosmos DB account that replicates to three Azure regions. Deploy the application to the three regions, Configure the Cosmos DB account for automatic failover.**D.** Deploy three separate Cosmos DB accounts Deploy the application to three Azure regions. Create a job that reconfigures the connections for each application.**Answer: B**
