Getting the SIAMP exam test will help you be qualified for some senior position or management positions, It is its own kind of resources designed by Photoexperienceacademy [Latest ACD100 Dumps Free](#) for all the students who want to succeed in life without wasting their time.

**NEW QUESTION: 1**You create a Power BI dashboard that displays data from Dynamics 365 Customer Engagement.You need to share the Power BI dashboard with coworkers.What are three possible ways to achieve the goal? Each correct answer presents a complete solution. NOTE: Each correct selection is worth one point.**A.** Export the data into Common Data Service for others to manipulate in Power BI.**B.** Publish the dashboard as an app to your coworkers.**C.** Export the data to Microsoft Excel for coworkers to import and view in Power BI.**D.** Embed reports in your company's internal web portal.**E.** Create a Power BI workspace and grant coworkers permissions.**Answer: B,D,E**Explanation:A: Basic Sharing for Dashboards and Reports through a workspace is the most common way of sharing the Power BI content. Basic Sharing is very simple and easy to use method. You can simply click on the Share button in the dashboard or report, and then share it with other users.B: Apps are great sharing method for multiple environment, and best way of sharing for users in production environment.Power BI App is the solution for multiple environment approach. With Power BI App, your development environment (workspace), and user environment (App) are isolated from each other.Note: If you are using SharePoint online as a portal for document management and some other reasons already, then consider using Embed in SharePoint Online feature of Power BI reports. This method is secure and you can share the report only with Power BI users you want.E: Sometimes, you don't need a secure way of sharing, you may search for an easy and free way of sharing, and your content is not confidential or sensitive. Publish to web is your friend in such situation. This is the only free way of sharing in Power BI, but be aware that this method is not secure.Publish to web method, gives you an embed code, which you can use in any web pages to embed the Power BI report in it Reference:

**NEW QUESTION: 3**You manage Microsoft SQL Server databases for an organization.You need to configure the databases to meet the following requirements:\* Encrypt the data at rest.\* Ensure that unencrypted values for specific columns can only be viewed by using a decryption key.\* Ensure that decrypted columns are only accessible by using database views.Which actions should you perform? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.**Answer:** Explanation:ExplanationBox 1: Configure TDE...in the master databaseTo protect all databases use a certificate in the master databaseNote: TDE encrypts the storage of an entire database by using a symmetric key called the database encryption key. The database encryption key can also be protected using a certificate, which is protected by the database master key of the master database.The encryption uses a database encryption key (DEK), which is stored in the database boot record for availability during recovery. The DEK is a symmetric key secured by using a certificate stored in the master database of the server or an asymmetric key protected by an EKM module.Box 2: Configure DDMDynamic data masking helps prevent unauthorized access to sensitive data by enabling customers to designate how much of the sensitive data to reveal with minimal impact on the application layer. DDM can be configured on the database to hide sensitive data in the result sets of queries over designated database fields, while the data in the database is not changed.References:
