NEW QUESTION: 1 The acronym CSMA stands for: **A.** Call signal message active. **B.** Carrier sense multiple access. **C.** Call signal multiple access. **D.** Carrier sense message active. **Answer: C**

NEW QUESTION: 2 Refer to the exhibit. Based on the Endpoint information shown, which collectors were used to profile the device as Apple iPad? (Select two.) **A.** DHCP fingerprinting **B.** SNMP **C.** HTTP User-Agent **D.** OnGuard Agent **E.** SmartDevice **Answer: A, C**
Explanation:
HTTP User-Agent
In some cases, DHCP fingerprints alone cannot fully classify a device. A common example is the Apple family of smart devices; DHCP fingerprints cannot distinguish between an Apple iPad and an iPhone. In these scenarios, User-Agent strings sent by browsers in the HTTP protocol are useful to further refine classification results. User-Agent strings are collected from:
* ClearPass Guest
* ClearPass Onboard
* Aruba controller through IF-MAP interface
Note: Collectors are network elements that provide data to profile endpoints. The following collectors send endpoint attributes to Profile:
* DHCP
* DHCP snooping
* Span ports
* ClearPass Onboard
* HTTP User-Agent
* MAC OUI - Acquired via various auth mechanisms such as 802.1X, MAC auth, etc.
* ActiveSync plugin
* CPPM OnGuard
* SNMP
* Subnet Scanner
* IF-MAP
* Cisco Device Sensor (Radius Accounting)
* MDM

NEW QUESTION: 3 **SIMULATION** Please wait while the virtual machine loads. Once loaded, you may proceed to the lab section. This may take a few minutes, and the wait time will not be deducted from your overall test time. When the Next button is available, click it to access the lab section. In this section, you will perform a set of tasks in a live environment. While most functionality will be available to you as it would be in a live environment, some functionality (e.g., copy and paste, ability to navigate to external websites) will not be possible by design. Scoring is based on the outcome of performing the tasks stated in the lab. In other words, it doesn't matter how you accomplish the task, if you successfully perform it, you will earn credit for that task. Labs are not timed separately, and this exam may more than one lab that you must complete. You can use as much time as you would like to complete each lab. But, you should manage your time appropriately to ensure that you are able to complete the lab(s) and all other sections of the exam in the time provided. Please note that once you submit your work by clicking the Next button within a lab, you will NOT be able to return to the lab. Username and

password Use the following login credentials as needed: To enter your password, place your cursor in the Enter password box and click on the password below. Username: Contoso/Administrator Password: Passw0rd!

The following information is for technical support purposes only: Lab Instance: 10921597 You need to identify the total number of events that have Event ID 63 in the Application event log. You must type the number of identified events into C:\Folder1\FileA.txt. To complete this task, sign in to the required computer or computers and perform the required action.

A. Open Event Viewer. * Click the log that you want to filter, then click Filter Current Log from the Action pane or right-click menu. This will open the Filter Current Log dialog box. * You can specify a time period if you know approximately when the relevant events occurred. You can specify the event level, choosing between Critical, Warning, Verbose, Error and Information. If you select none of these, all event levels will be returned. You can't modify which event log is being checked as filters apply only to a single log. * You can choose the event sources which have generated the log entries, and search for key words, users, or computers. You can also search using specific event IDs.

B. Open Event Viewer. * Click the log that you want to filter, then click Filter Current Log from the Action pane or right-click menu. This will open the Filter Current Log dialog box. * You can specify a time period if you know approximately when the relevant events occurred. You can specify the event level, choosing between Critical, Warning, Verbose, Error and Information. If you select none of these, all event levels will be returned. * You can choose the event sources which have generated the log entries, and search for key words, users, or computers. You can also search using specific event IDs.

Answer: A

Explanation: Reference: <https://www.manageengine.com/products/active-directory-audit/kb/how-to/how-to-search-the-event-viewer.html>

NEW QUESTION: 4 Virtual machine desktops using GPU pass-through technology will lose features such as hot migration and HA. **A.** False **B.** True **Answer: B**
