NEW QUESTION: 1A. Option AB. Option BC. Option DD. Option CAnswer: B

NEW QUESTION: 2Answer: Explanation:ExplanationInstanceCount Default value is -1 which means that DnsService is running on every node. OneBox needs this to be set to 1 since DnsService uses well known port 53, so it cannot have multiple instances on the same machine. References:

<https://docs.microsoft.com/en-us/azure/service-fabric/service-fabric-cluster-fabric-settings>

NEW QUESTION: 3You need to recommend Archiving Solution that meets the Business Goals and Technical Requirements.Which two actions should you recommend?Each correct answer presents part of the solution. Choose two.**A.** Create new Front End Pool for the Sales Department and a new Front End Pool for the Research Department. Configure Archiving for the New Pools.**B.** Create a new Front End pool. Home the Sales Department Users and the Research Department Users on the new Pool. Configure Archiving for the new Pool.**C.** Configure the Global Archiving Policy.**D.** Home the sales department users on Front End pool in the United State. Home the Research Department Users on the Front End Pool in Europe. Configure Archiving for for each Pool.**E.** Create a new User-Level Archiving Policy.**Answer: C,E**
Explanation:Topic 5, Contoso Ltd. Case BOverviewGeneral OverviewContoso, Ltd. is an international manufacturing company that has 30,000 users.Contoso has the following departments: sales, research, marketing, human resources,executive, manufacturing, and legal. The sales department has 2,000 users.All of the users in the sales department are located in the United States.The research department has 3,000 users.All of the users in the research department are located in Europe.Physical LocationsContoso has two main offices. The offices are located in Houston and Frankfurt.Each office has 15,000 users.The offices connect to each other by using an MPLS network. Each office connects directly to the Internet.Existing

EnvironmentLync Server InfrastructureContoso has a Lync Server 2010 infrastructure that only uses internal instant messaging (IM) and presence. The infrastructure contains a single Enterprise Edition Front End pool that services all of the users. Contoso uses a SIP domain of contoso.com for all of the users. Client computers have either Microsoft Office Communicator 2007 R2 installed or Microsoft Lync 2010 installed. Before deploying Lync Server 2013 and migrating the users to Lync Server 2013, you implement a small pilot project to test the functionality of Lync Server 2013. Problem StatementsThe users in the pilot report that occasionally, they cannot sign in to Lync 2013. RequirementsBusiness GoalsContoso plans to upgrade to Lync Server 2013 during the next six months. Contoso must deploy all of the Lync Server conferencing and edge services. Contoso must also configure federation with its parent company, which is named Proseware, Inc. Proseware is located in Europe and has an Office Communication Server 2007 R2 infrastructure. Contoso must minimize hardware and software purchasing costs, while guaranteeing performance levels for all Lync Server 2013 workloads. Planned ChangesContoso plans to implement the following workloads in the Lync Server 2013 deployment:FederationDial-in conferencingExternal user accessAudio, video, and web conferencingThe ability to host Lync meetings that have external participantsThe FQDNs of the edge services will be configured as shown in the following table. Technical RequirementsContoso identifies the following technical requirements for the planned deployment:Only Federation to Proseware must be allowed.All of the Edge services must use default ports.WAN traffic and Internet traffic must be minimized.All of the user contacts stored in Lync Server 2013 must be backed up.The sales department must have a dedicated dial-in conferencing number. All other users in both the United States and Europe must use a pool of regional dialin conferencing numbers.If a Single Component fails, all Lync Services MUST remain available without the need for manual intervention. Performance degradation is acceptable during a component failure state.The conversations of all the sales department users must be archived for 30 days.The conversations of all the research department users must be archived for 90 days. No other conversations must be archived.After the migration to Lync Server 2013, all client computers will have three months to upgrade to Lync 2013. After three months, legacy clients must be blocked from accessing the Lync Server 2013 infrastructure. Security RequirementsContoso identifies the following security requirements for the planned deployment:All Lync Server conferences must use a unique URL.Each Internet-facing service must have one or more dedicated public IP addresses.Only the users in the human resources department must be prevented from connecting to Lync Server remotely.
